

**Hall
Longmore**

HEALTH SAFETY & ENVIRONMENTAL POLICY STATEMENT

OHSAS 18001 & 14001

Hall Longmore is a world class manufacturer of large bore, coated and welded steel pipes. We undertake to implement best practices in our business operations, which will ensure the protection of the environment, health and safety for employees and other stakeholders.

Hall Longmore personnel and management are committed to comply and operate a management system in accordance with internationally recognized safety, health and environment management systems at all our operations to continually improve its effectiveness.

We will achieve this by:

- Prevention of pollution to water and land as well as prevention of injuries and ill health to Hall Longmore employees and visitors
- Comply with all applicable Health, Safety and environmental legislation relating to Hall Longmore business and operations.
- Promoting occupational health, safety and environmental awareness for all employees through training and education.
- Continuously identify and address hazards in the work place
- Continuously reviewing and improve our health, safety and environmental management system for effectiveness and measure performance against objective and targets set.
- Communicate awareness towards the achievement of company objectives and targets for health, safety and environment
- Communicating this policy to all employees, suppliers, contractors and interested and affected stakeholders.
- Annually reviewing the relevance and appropriateness of this policy.

All levels in the organization are responsible and encouraged to participate in our drive to zero harm from the impact of our business to all employees, clients, suppliers and the community.

K.C van Rooyen
